

Cyber & Information Security

Cyber & Information Security from CityLearning is a leading training solution for credit and financial institutions. This interactive eLearning course describes how changing cyber and information security concerns impact staff roles and responsibilities.

Cyber & Information Security offers a practical way of ensuring that your staff are trained and tested in understanding cyber and information security risks, and protecting against them. All test results are recorded for easy verification of compliance training.

CityLearning is a leading provider of compliance eLearning solutions in the UK and Ireland.

Who is it For?

Tailored versions of Cyber & Information Security are available for different financial sectors including:

- Retail banking
- Wholesale banking
- Life assurance
- Leasing and finance
- Mortgage providers
- Asset management
- Investment banking
- Treasury
- Stockbroking
- Credit unions
- Solicitors
- Accountants

What Does the Course Cover?

Cyber & Information Security consists of three modules, each covering a key aspect of cyber and information security, and ending with a short module quiz comprising randomly generated questions. A course test, also randomised and based on specific objectives of all three modules, completes the course.

Principles and Responsibilities

- defines cyber and information security and explains why it is necessary.
- explains the three principles of cyber and information security.
- discusses employees' responsibilities with regard to cyber and information security.

Threats, Risks and Breaches

- defines information assets and information security risks.
- discusses vulnerabilities and threats and their consequences.

Security Measures

- explains the importance of access control.
- explains how to handle information in the office, on the internet and through email.
- identifies security concerns related to remote working and identifies methods to reduce these risks.
- explains how to recognise and react appropriately to security threats and breaches.

Sample Case Studies – Case Studies Updated Annually

A woman was fired for posting an image of herself gesturing at President Trump's motorcade to two social media sites.

An unencrypted USB stick containing confidential files regarding security at Heathrow Airport was found on a London street.
